

G-Print Smooth

G-Print Smooth is a paradox. It is a woodfree, coated matt paper for demanding image reproduction, yet with significant bulk and stiffness - and a low-reflecting surface which guarantees good readability. G-Print Smooth has a smooth surface for reproduction of high-resolution photographs. Opacity, bulk and stiffness are very high compared to other silk and matt papers. It also has a rich paper feel, outstanding runnability and post-treatment properties. G-Print Smooth is ideal for art books, covers, luxury magazines, Direct Mail, brochures, catalogues, folders, posters, inserts and cards. G-Print Smooth is available both as sheets and reels in various sizes in grammages from 90 to 250 g/m². G-Print Smooth standard products are available as FSC™ and PEFC certified.
