Re-board® Brown

A kraft coloured, lightweight yet strong board designed to support sustainable messaging. Built on the patented fluted core, it offers excellent flatness, easy converting and reliable print performance.

Both the liners and core are made from 100% paper and contain no plastics, creating a fully fibre-based display solution. Additionally, there's no harmful components and it uses water-based adhesives, allowing the board to be recycled as paper through standard wastepaper streams.

Applications

Signs and display • Point of sale • Mounting

Print suitability

UV • Screen print • Latex
