Re-board®
Fire Retardant

Re-board Fire Retardant is a Euroclass C certified rigid fibre-based board, offering limited fire spread and very low smoke production.

It is lightweight yet strong and fully recyclable, designed for applications requiring certified fire performance and structural integrity. Built on a patented fluted core, it delivers excellent flatness, design flexibility and a premium print surface, making it suitable for complex 2D and 3D constructions.

Both the liners and core are made from 100% paper and contain no plastics, creating a fully fibre-based display solution. Additionally, there's no harmful components and it uses water-based adhesives, allowing the board to be recycled as paper through standard wastepaper streams.

Applications

Signs and display • Point of sale • Mounting

Print suitability

UV • Screen print • Latex

Certified for HP Latex Inks
