Re-board® Premium

A lightweight yet strong rigid paperboard featuring bright white liners on either side and a patented brown fluted core with tilted fibres, providing excellent flatness, structural integrity and design flexibility.

Both the liners and core are made from 100% paper and contain no plastics, creating a fully fibre-based display solution. Additionally, there's no harmful components and it uses water-based adhesives, allowing the board to be recycled as paper through standard wastepaper streams.

Applications

Exhibition displays • Point of sale • Lightweight and recyclable furniture • Signs and display

Print suitability

UV • Screen print •Latex Certified for HP Latex Inks
